### **Summary:**

I am currently learning Android development with Android Studio, focusing on Kotlin and Java. I'm exploring how to design user-friendly interfaces, add core functionalities, and build seamless Android applications. This journey is helping me gain hands-on experience in app development and with some basic knowledge of computer architecture and operating systems

### **Education : Bachelor of Computer Applications**

Competency: Kotlin, Java, Microsoft Administration, Cloud Security

### **Projects:**

1. Sage pass Solution (collage pass solution)
2. Skin Gpt (Skin detection app)
3. Floor Visualizer (interior designing app)
4. Hate Speech Detection (prompts when using any abusive words)
5. Document Classifier (Simplify Document Searching method)

### **Certifications:**

1. Cyber Security
2. Best Attendance Award
3. Best innovator Award
4. Participation Certificate in Sih
5. Fundamental of cloud Security
6. Oracle Cloud

### **Extra-Curriculars**

- Participated in hackathons and innovation challenges.

### **Soft Skills**

- Problem-Solving
- Team Collaboration
- Time Management
- Adaptability
